## HLN CORE SERVICES

### Specialized Health Care Applications.

HLN provides in-depth subject matter expertise to produce high-quality technology solutions in core areas of public health, including maternal and child health systems, emergency preparedness and response, integrated systems and NHIN/RHIO planning.

### Business Analysis and Process Re-design.

HLN shines in the midst of challenging analytical projects; the thrill of new discovery fuels our most creative moments. We embrace a variety of methodologies that successfully engage clients to envision innovative practical solutions.

### Needs Assessments and System Reviews.

HLN brings over a decade of experience in assisting clients in assessing their current state and defining their value proposition. Whether functional, technical or programmatic, we provide fastidious documentation and employ tools that maximize re-usability of information.

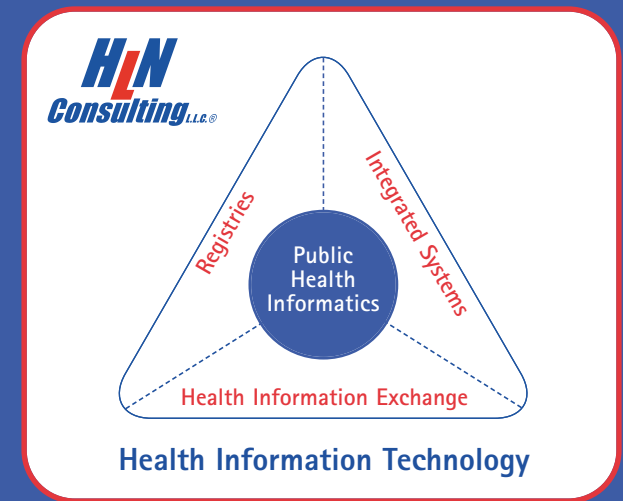

### Software Design and Development.

HLN professionals provide both a breadth of exposure and a depth of experience in many different technologies and methodologies. We excel at integrating different technologies to produce seamless reliable systems.

### System Planning and Operations.

HLN is on the cutting edge in issues relating to security, disaster avoidance and recovery, high availability, and server/network design and configuration. We stabilize technical environments by working with other vendors and our clients' information technology support organizations.

## HLN SPECIALTY AREAS

## HLN COMMITMENT

- We engage actively and continuously with the health care community on a local, regional, and national level, contributing to the conceptualization of emerging issues through our research, speaking and writing.
- With a cadre of professionals from diverse backgrounds, we design and develop flexible versatile solutions that create superior value for our clients.
- Our reputation as a results-oriented company is reflected in strong collaborative relationships that together empower us to meet our clients' current and future needs.
