

## Public Health Software - GSA Product Price List

Effective Date: 6/1/10

Product Code	Software Name	Description	License Price (w/IFF)	Maintenance
WFR	Web File Repository	WFR is a fully web-based utility for file upload, storage, and download. Nothing other than a standard web browser is required for a user to upload a file to a private directory for retrieval by an authorized administrator. Application screens can be customized to match website style. When used in conjunction with SSL, the transmission of files to the repository is fully encrypted. This product is useful for secure file submission/collection applications over the Internet where additional products (like SSH) are not practical or affordable.	\$5,541	\$1,662
WFR-ENC	Web File Repository Encryption Module	Provides seamless and transparent encryption of all WFR files on the server.	\$1,108	\$332
WFR-ENC-ENH	Web File Repository Enhanced Encryption Module	Provides enhanced encryption capabilities including selective file encryption with selectable keys, and both symmetric asymmetric keys for encryption/decryption.	\$2,015	\$605
